

POPSICLE STICK MATCH

— PRINT & PLAY ACTIVITY —

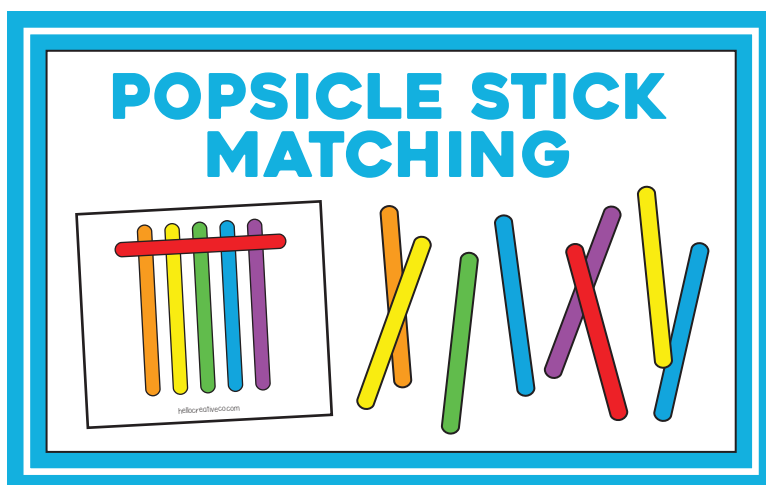

Let your little ones have some hands-on fun with our popsicle stick matching! This activity is great practice for patterns, matching, and simple engineering.

SETUP

1. Print the popsicle stick cards onto a piece of thick paper or cardstock and follow the dotted lines to cut them out.
2. To make the cards last longer, you can laminate them or cover them with contact paper. Contact paper is a bit thinner but much cheaper!
3. Now it's time to play! Grab some colored popsicle sticks (or take regular wood craft sticks and paint them yourself) and have your little ones try to match the sticks on each card, or finish the patterns on the beginning cards. Depending on your child's skill level, have them pay attention to where the sticks lay (are they on top or underneath the other sticks?).

WAYS TO PLAY

- Simply take one card at a time and try to recreate the image.
- How fast can you finish a card? How fast can you finish 3 or 5 cards?
- Create your own cards or popsicle stick patterns and have a friend try to recreate it!

Cut this out and use it as a label for your busy box/bag!
